

ECL空胶囊上料机

ECL Empty Capsule Automatic Charging Machine

► 介绍 (Introduction)

ECL-370空胶囊上料机是专为制药行业设计的高效系统，它利用涡流气泵创造真空状态，确保胶囊充填过程高效精准。具备真空材料系统，可控且干净的充填环境。操作简便，可调节喂料机时间和加料速度，提高生产效率。紧凑设计，适用于各种尺寸和类型的空胶囊，确保准确一致的结果。ECL-370空胶囊上料机是胶囊灌装生产线的重要组成部分，将空胶囊充填过程精密控制在您手中。

ECL-370 empty capsule loader is a highly efficient system designed for the pharmaceutical industry, using a vortex air pump to create a vacuum state to ensure efficient and accurate capsule filling process. Equipped with a vacuum material system, a controlled and clean filling environment. Easy to operate, adjustable feeder time and feeding speed to improve production efficiency. Compact design, suitable for various sizes and types of empty capsules, ensuring accurate and consistent results. The ECL-370 empty capsule loader is an important part of the capsule filling production line, putting the precise control of the empty capsule filling process in your hands.

► 技术参数 (Technical Parameters)

参数ITEM	型号TYPE	ECL-370
电源 Power	kw	0.37
电压 Voltage	v	380
外形尺寸 Overall Size	mm	800*550*2010
机器净重 Net Weight	kg	52
